Education

Cebu Technological University - Argao Campus

Bachelor of Science in Information Technology.

Argao, Cebu

Jun 2026

Experience

IT Tech Support Intern

Trans-Asia Shipping Lines, Inc.

Cebu City

Apr 2026–Present

- Deployed office and vessel network setups using Ruijie PoE switches, access points, LAN cabling, WAN links, Starlink, and airFiber point-to-point connections.
- Registered devices by MAC address in Ruijie Cloud and DHCP systems to enable controlled network and internet access.
- Troubleshoot Windows PCs, printers, shared network printers, NAS access, software issues, while performing OS reformatting, IT asset inventory, and hardware upgrades (SSD/RAM).
- Assisted with on-premises infrastructure support, including Windows Server exposure, CentOS/Red Hat Linux server restarts, and PostgreSQL data extraction for shared network distribution.

Projects

Serverless Microservices Architecture (Azure & Terraform)

Cloud Infrastructure / DevOps

Personal Project

Dec 2025–Present

- Architected a serverless infrastructure on Azure using Terraform (IaC) to provision Resource Groups, Function Apps, and Storage Accounts.
- Built CI/CD pipelines using GitHub Actions to automate builds and deployments for the React frontend and Node.js microservices.
- Integrated Azure Cosmos DB, Key Vault, and Application Insights for data storage, secret management, logs, traces, and performance monitoring.

Tito Ride (Ride Scheduler App)

Cloud Engineer / Full Stack Developer

Personal Project

Nov 2025–Present

- Deployed a MERN stack app using Azure Static Web Apps, App Service, and Cosmos DB.
- Implemented Managed Identity and Application Insights for secure connectivity and monitoring.

Cares Platform (Patient Management System)

UI/UX Designer & Frontend Developer

Capstone Project

Feb 2025–Nov 2025

- Developed responsive frontend interfaces for Mass Screening and Medication Request modules for EJACC/RAFI workflows.
- Worked in an Agile team to digitize paper-based patient screening and management processes.

Skills & Training

- **Training:** AZ-104 Azure Administrator Associate course in progress; target exam July 2026.
- **Cloud & DevOps:** Azure Functions, App Service, Cosmos DB, Key Vault, Application Insights, Terraform (IaC), GitHub Actions (CI/CD), Docker, Azure Container Registry (ACR).
- **Azure Administration:** Virtual Machines, VNets, Subnets, NSGs, Azure Bastion, Load Balancer, DNS.
- **Networking & Infrastructure:** TCP/IP, DHCP, LAN/WAN, PoE Switches, Access Points, Ruijie Cloud.
- **Operating Systems & Scripting:** Linux (CentOS, Red Hat), Windows Server, PowerShell Basic, Bash, Azure CLI Basic, Git.
